What have you done to make your community a better place?

I assist my community through church. I teach catechism to many children on Saturdays. I usually teach children between the ages of six through ten I do this through many different teaching methods because every student has a different way of learning. I always rotate different learning games that I can play with them sometimes we play hang flower and have them guess words that we learned during class. If they do get the word they must tell me the definition and by the end of the class they know what they learned. I try and make all of my classes fun and interesting for the students they always laugh and enjoy the work that they do. I do think that teaching this children about God does affect our community they have different mentalities and if they do decide to keep learning about God they will most likely stay away from bad influences. I hope to help them the way that my teacher helped me. To allow them to pursue a better life and have more opportunities.
